

Corporate Overview

Translating Business needs into technology solutions since 1992

Information Management Resources, Inc. (IMRI) is an industry-leading provider of technology, program management, engineering, and cybersecurity services for the commercial and government sectors. The company is a change integrator that leverages its 27 years of highly-specialized data center expertise to provide its clients with integrated, solution-based programs to help them meet the current and ever-changing technology challenges. Working with the largest networks in the world, IMRI operates within CONUS and OCONUS to provide its clients with the best teams, methodologies and tools to integrate with any enterprise and truly become its technology partner. Cytellix, the cybersecurity division of IMRI, has the only solution in the industry that can detect unknown cyber threats on the network, giving government and commercial organizations complete visibility of the enterprise. The highly-scalable Cytellix solution combines industry-leading expertise and cutting-edge technologies to provide complete network situation awareness to the government and companies ranging from small- and medium-sized businesses to large enterprises. Built upon IMRI's 27 years of IT security expertise, Cytellix has been an expert in cybersecurity for nearly a decade, since the very emergence of cybersecurity as a global concern, and today protects some of the largest, most sensitive networks in the federal government.
